

I-Analyzer: a flexible interface for full-text search, filtering and visualization

Berit Jansen, Mees van Stiphout, Luka van der Plas¹

Goals:

1. Provide an easy-to-use tool to search and filter large text corpora

Search

Download csv

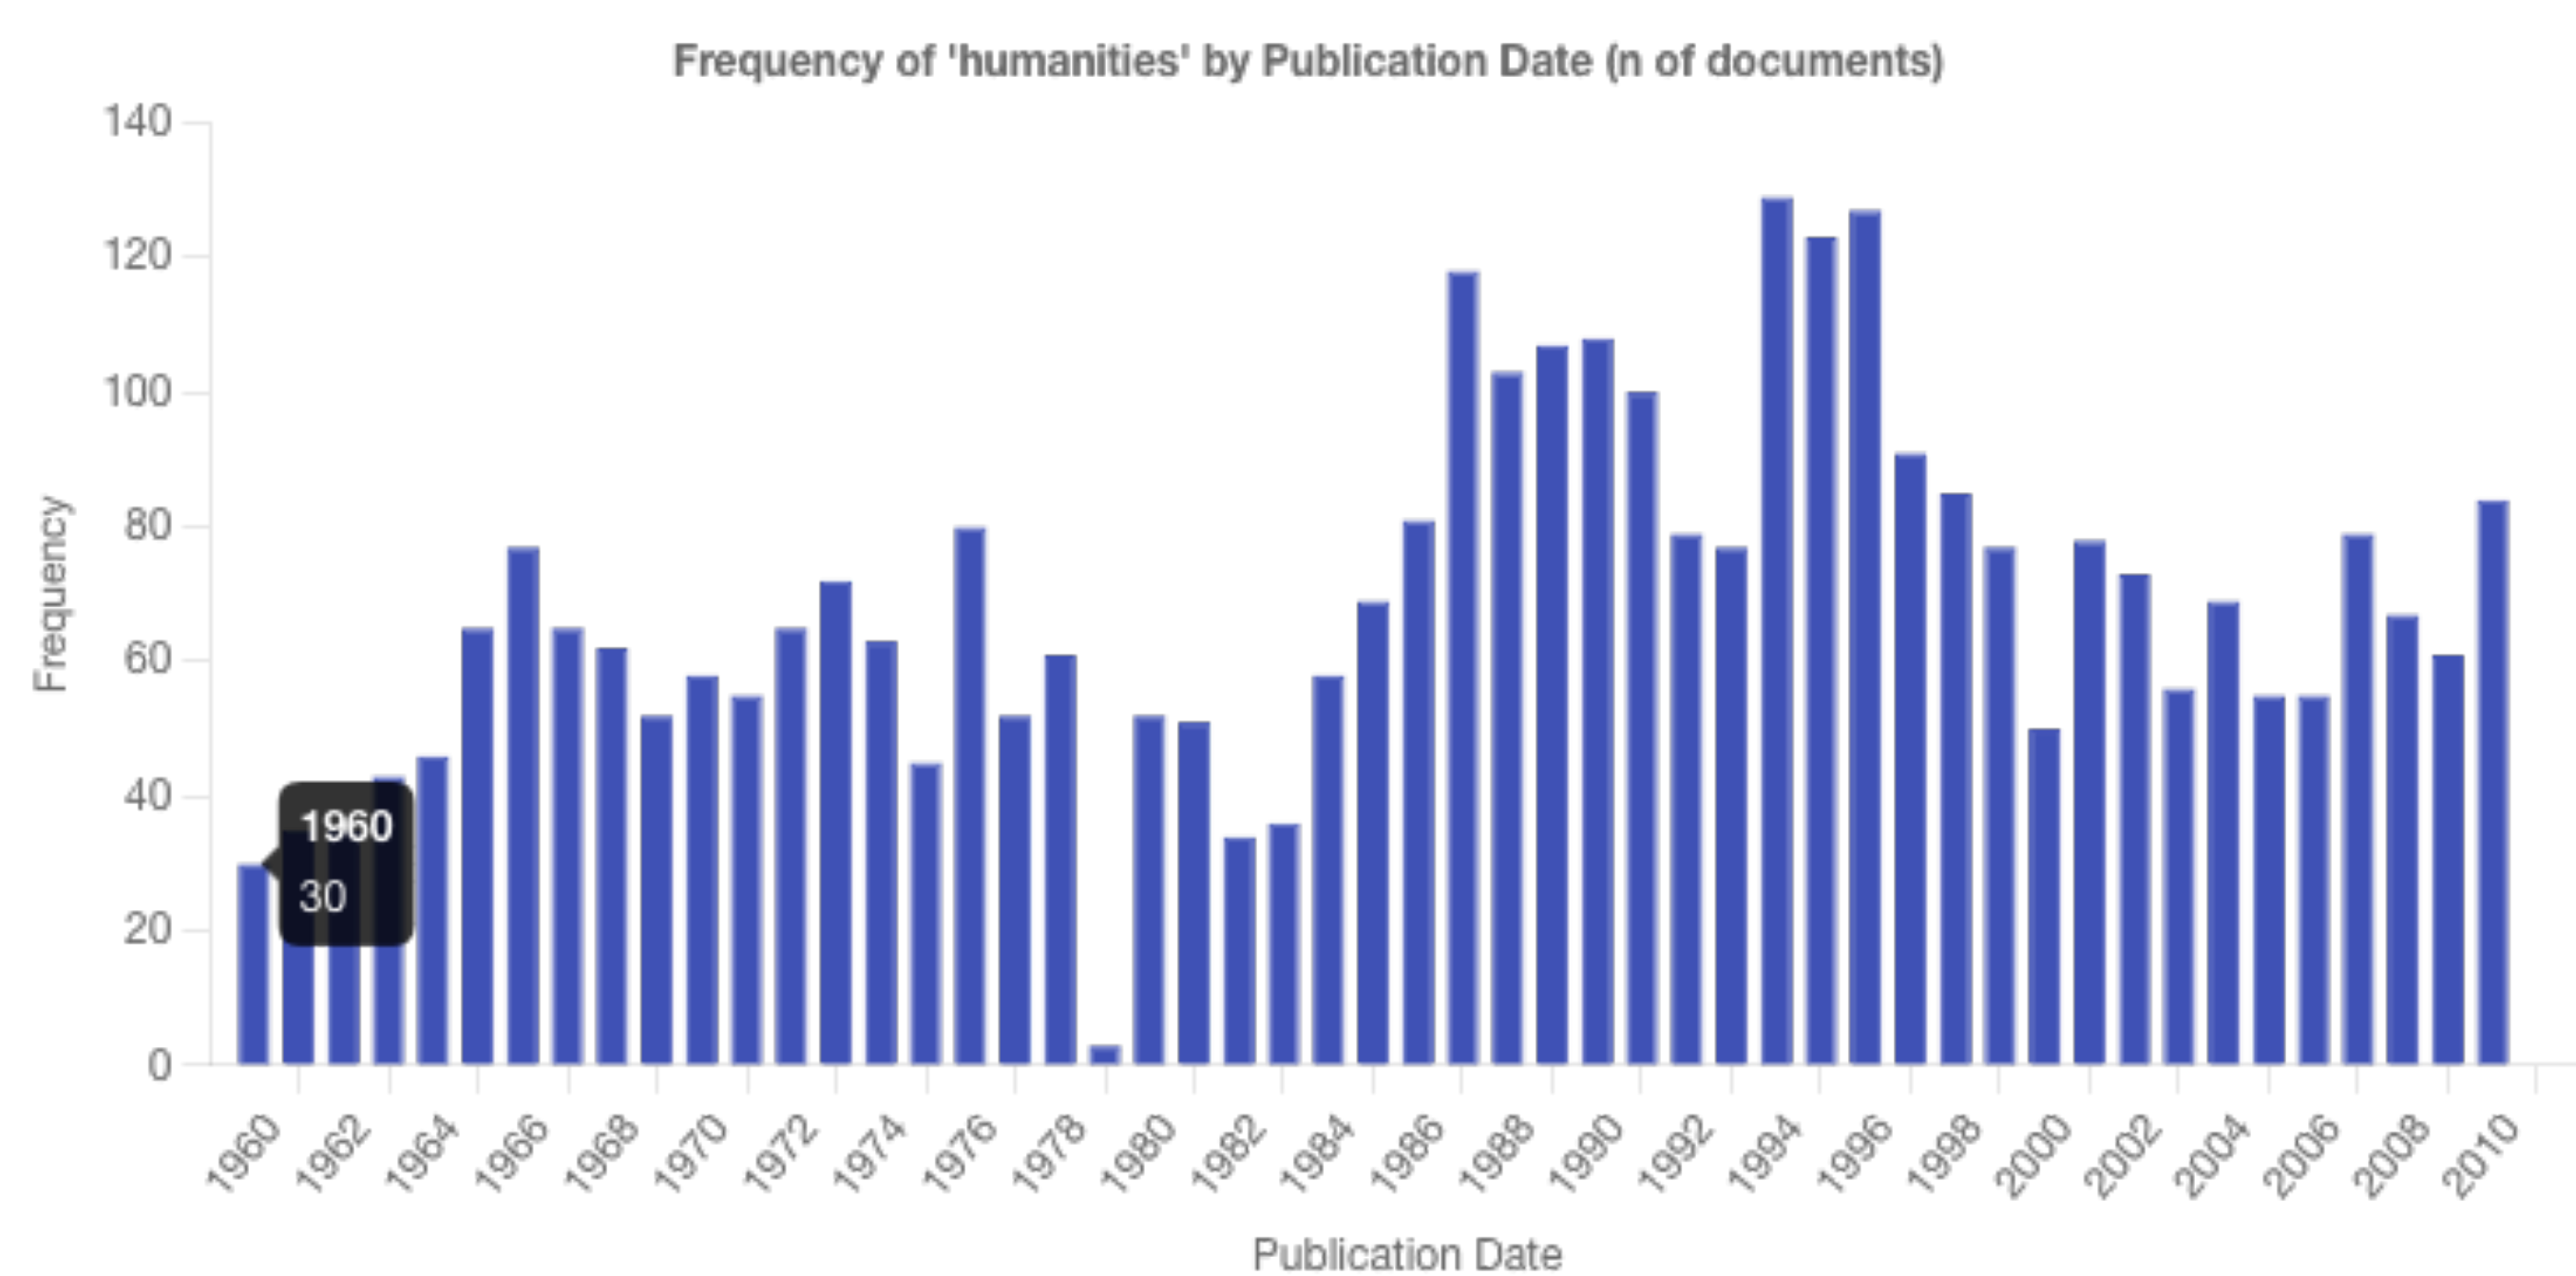

Filters

Publication Date

Author

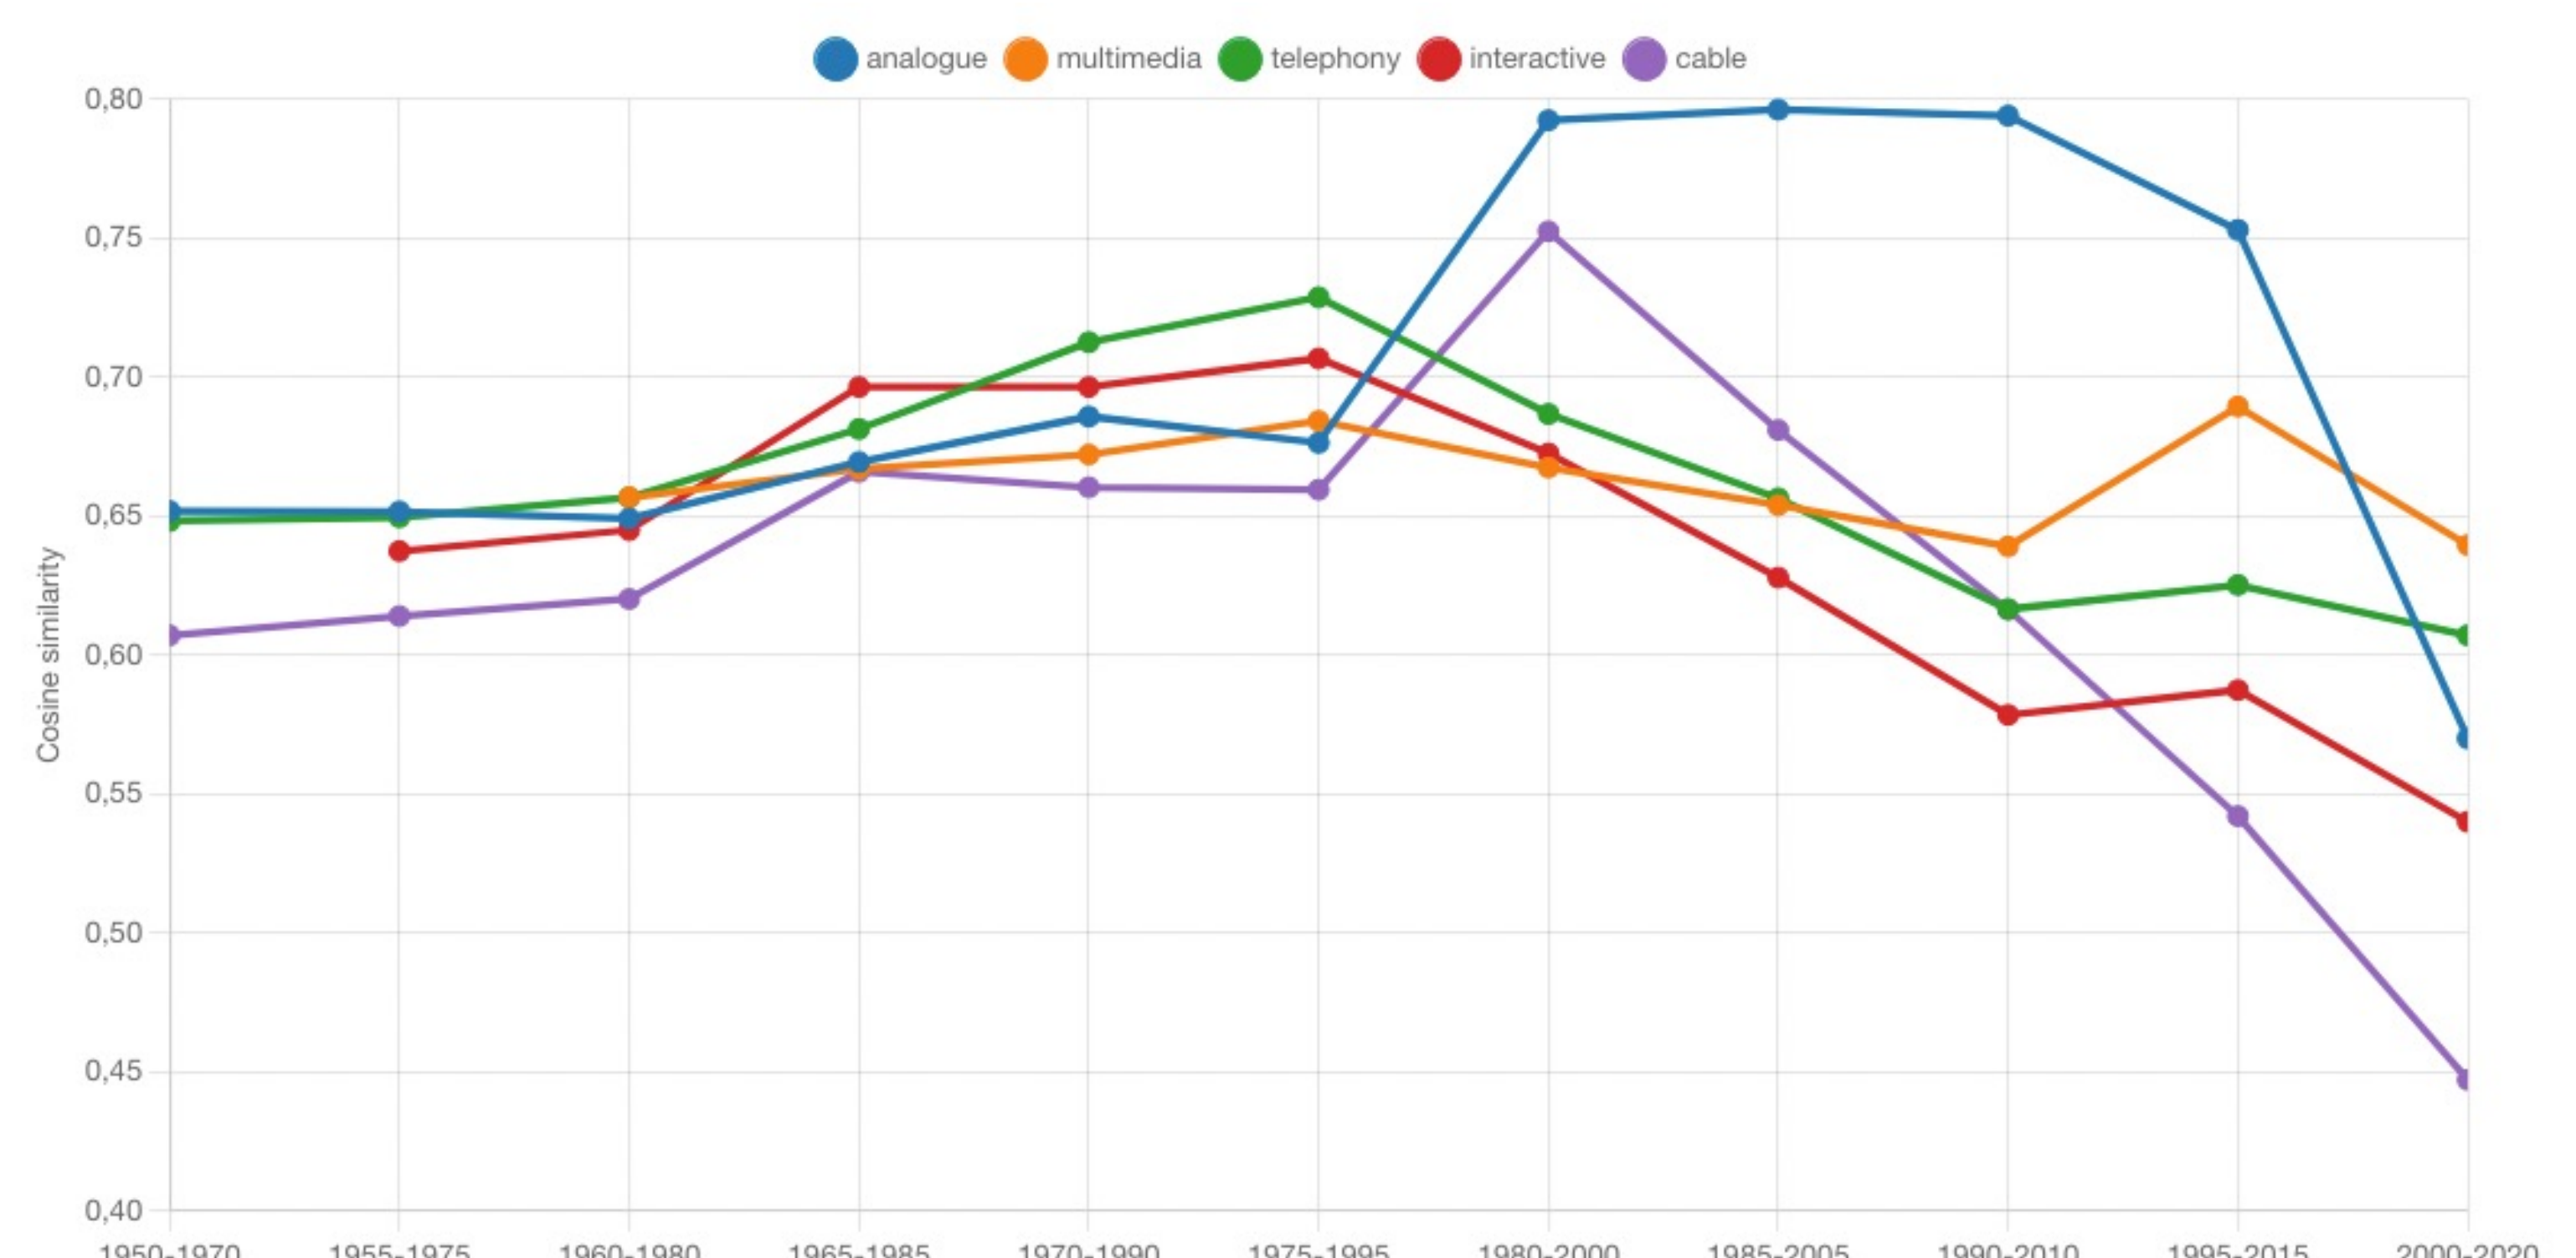

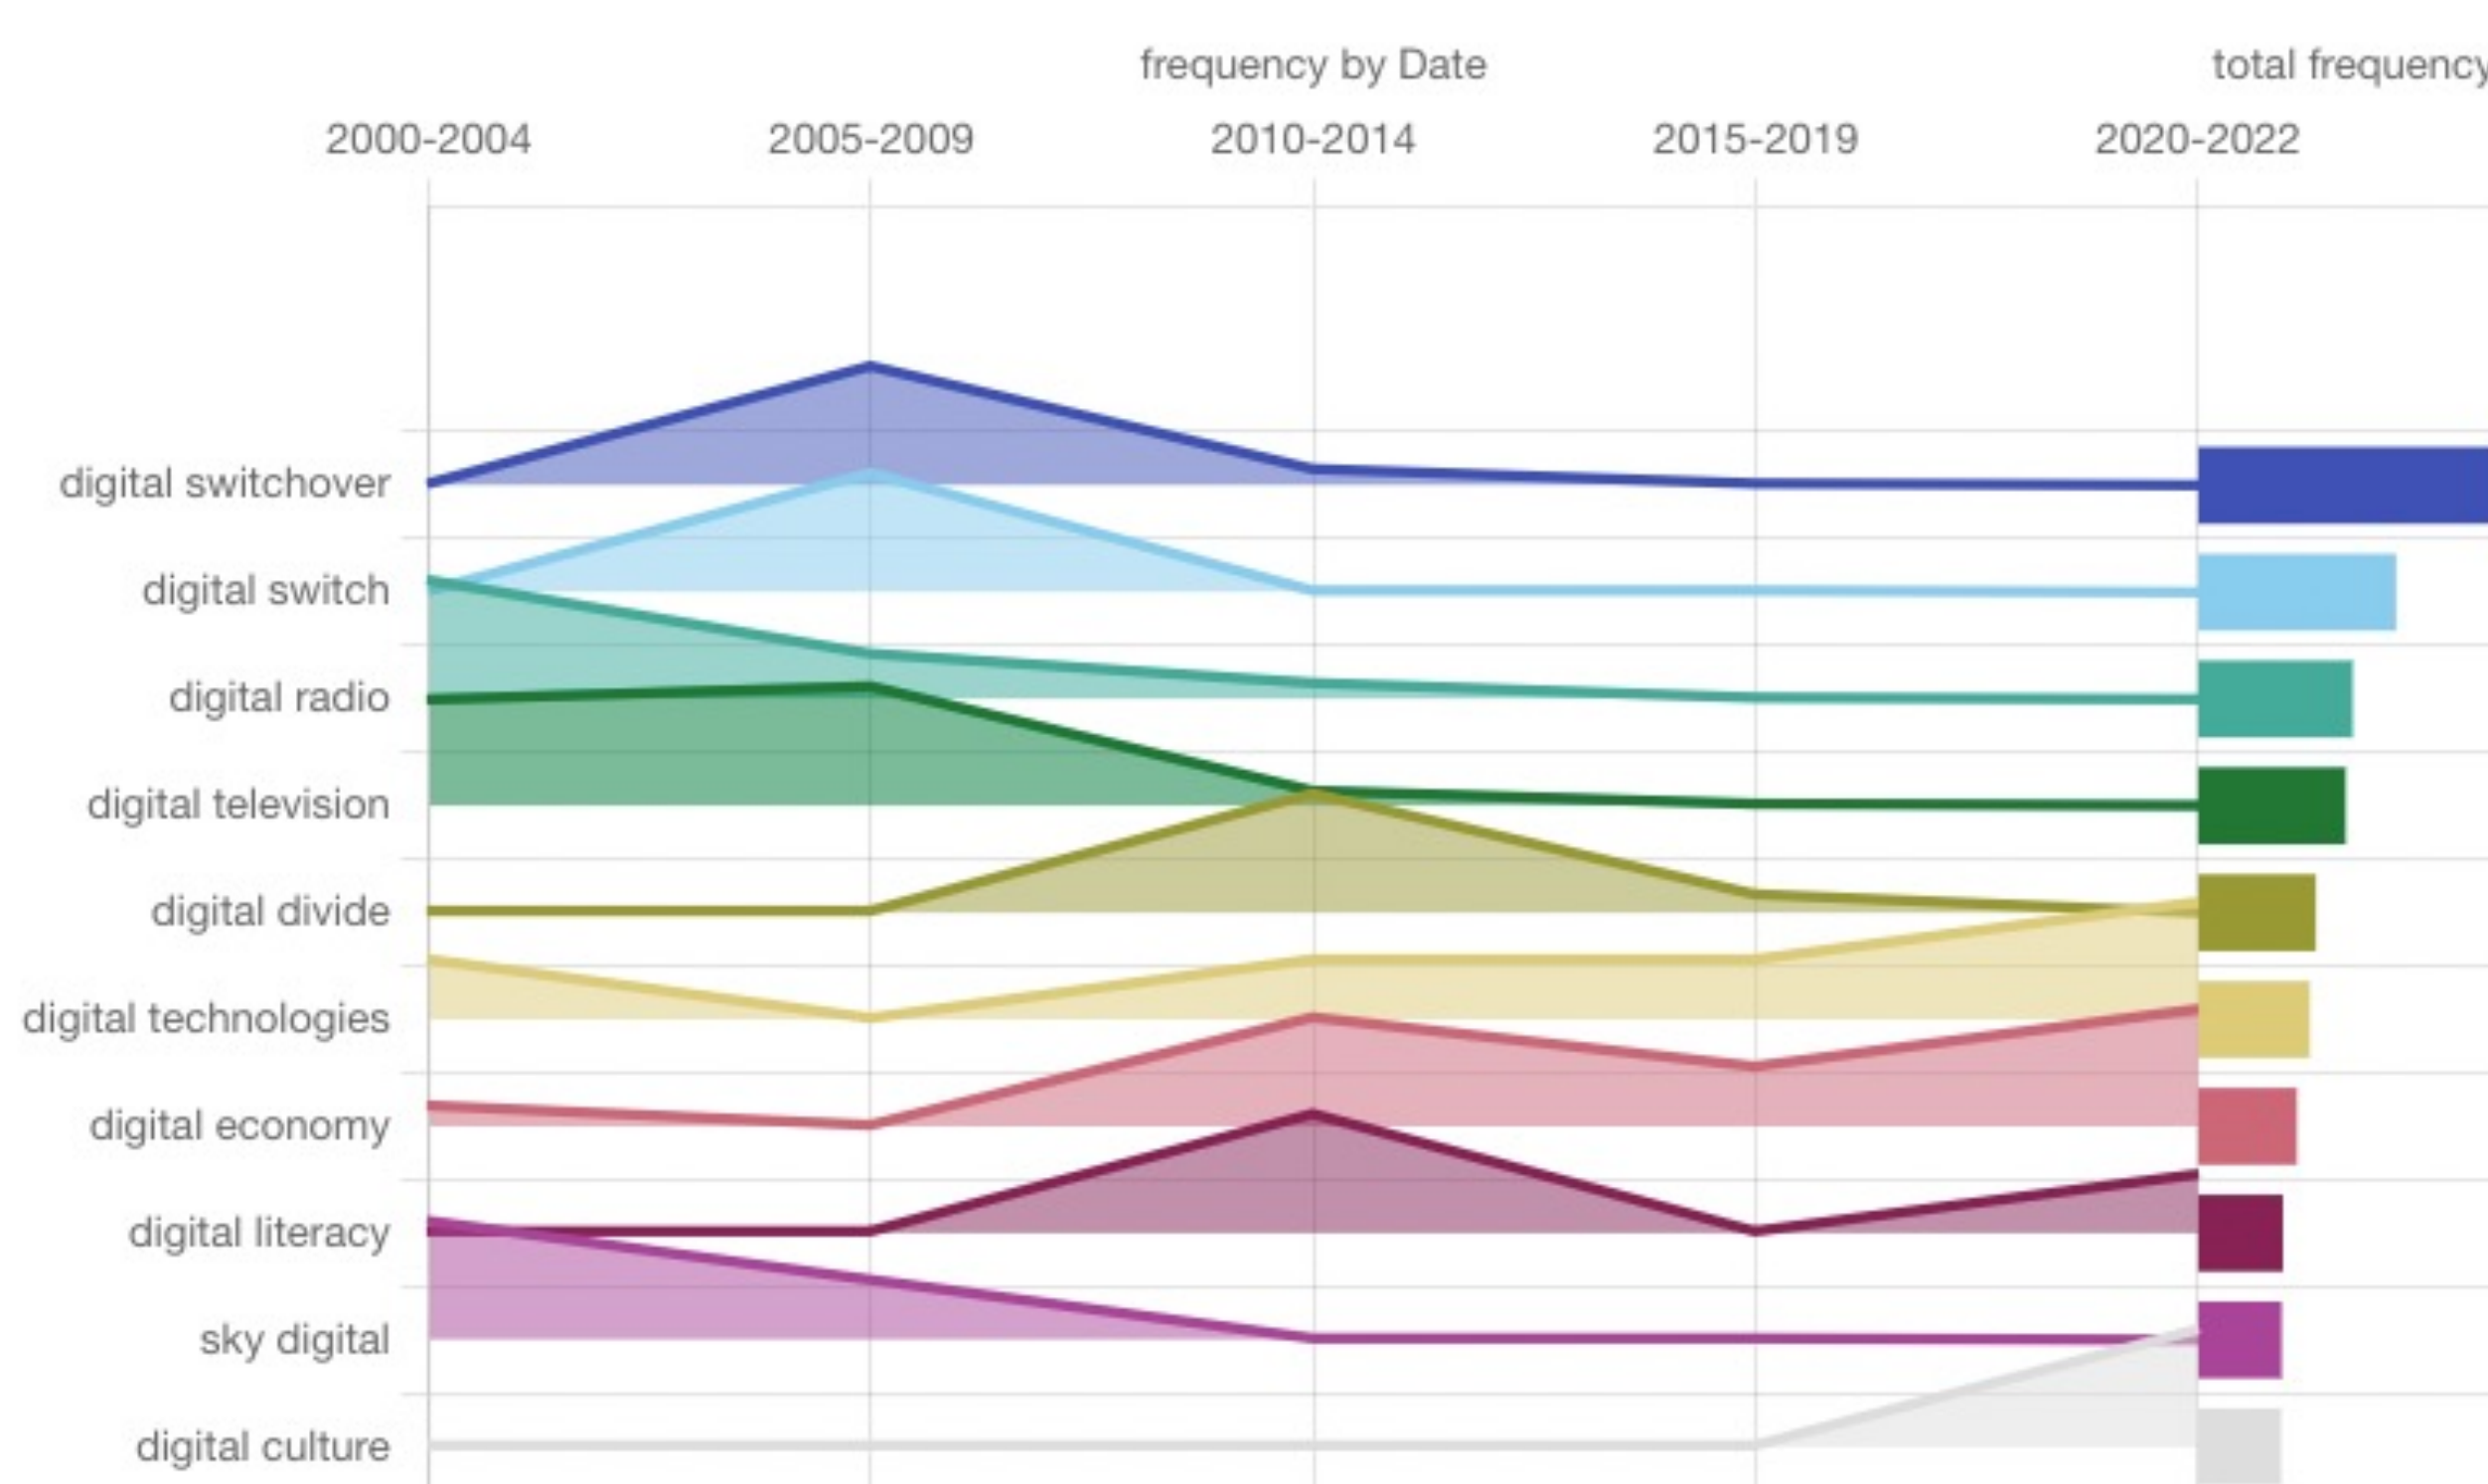

OCR confidence

2. Create visualisations for search and analysis purposes

3. Offer text mining functionalities such as n-gram analysis and word models

N-gram and Word Model Visualisations for 'digital' in the UK Parliamentary Corpus
